

Cloud Content Management

What you need to know

Businesses today are facing unprecedented disruption due to digital transformation. Companies need to operate faster than ever, workplace technology can make or break productivity and the risk of cyber threats and regulations are growing. Content is at the center of all these challenges but existing technology solutions are not efficient, secure or affordable. That's where Cloud Content Management from Box comes in. Cloud Content Management gives you a single content platform to accelerate business processes, improve employee productivity and protect your most valuable information.

Here's what Cloud Content Management from Box can do for your business:

Deliver business and IT outcomes

- Improve customer experience**
Increase customer retention with a tailored digital experience
- Increase employee satisfaction**
Provide a digital best-in-class workplace for employees
- Reduce risk**
Ensure security and data protection consistently across all content

- Accelerate cycle times**
Speed up collaboration and business processes
- Reduce costs**
Retire legacy storage and content management infrastructure
- Improve IT productivity**
Reduce infrastructure and end-user administration and support

How Box works

Digital business

- Intelligently organize data to drive insights and processes at scale by leveraging flexible metadata
- Utilize best-of-breed AI/ML to unlock insights from images, audio, video and documents
- Accelerate content-driven processes across the extended enterprise with built-in workflow automation
- Unify content across systems and third-party apps, providing a single source of truth for critical processes
- Deliver custom apps and experiences to employees, customers and partners faster and at lower cost

Digital workplace

- Improve internal and external team collaboration by avoiding fragmented content experiences
- Enable one source of truth for content across 1,400+ best-of-breed integrations
- Support first-class viewing / editing for all file types (e.g., Microsoft, Google, Adobe)
- Maintain consistent file information, metadata and unlimited version history
- Ensure security and compliance of content across apps while providing a first-class user experience

Security and data protection

- Gain visibility and control with one console for administration of all users, content and integrations
- Ensure the right access with granular permissions for internal and external collaboration
- Secure sensitive data with preview-only access, dynamic watermarking and automatic expirations
- Enforce mobile and desktop device security policies with Device Trust
- Enable integrations with leading, best-of-breed security and data protection partners

“Box has become the industry standard in this space and we’ve chosen it to continue our drive toward efficiency, security and simplicity for all our employees.”

David Smoley, CIO, AstraZeneca
