DXC and Microsoft at a glance

- 30+ year strategic partnership, 27+ years of reselling, 60+ years of innovation
- 20K+ Microsoft-trained and -certified professionals; 24 Gold and Silver competency areas
- 70 countries in global delivery network
- 8M+ user devices, 5.7M+ Office 365 seats managed, 42K licensing agreements
- 15K customer affiliates

About Microsoft

Microsoft (Nasdaq “MSFT” @microsoft) enables digital transformation for the era of an intelligent cloud and an intelligent edge. Its mission is to empower every person and every organization on the planet to achieve more. **Learn more at www.microsoft.com**

DXC Technology and Microsoft, global strategic partners for more than 30 years, are leading the charge in the digital revolution. We jointly develop and implement solutions that combine the strengths of Microsoft’s leading cloud platform with DXC’s unrivaled expertise and consulting, systems integration and managed services capabilities. Together, we deliver transformative digital offerings that help you harness the power of innovation to create new ways of connecting people, data and processes; reduce complexity; and boost efficiency, collaboration, control and security.

Customer benefits

DXC and Microsoft lead your digital transformation journey through an intelligent cloud platform that seamlessly integrates the entire Microsoft stack. We transition you to more agile, service-oriented IT models — improving your ability to adapt to changing market conditions and drive business growth. We drive tangible business results on the Microsoft platform to give you the insights, agility, control and security you need to confidently thrive on change.

- **Intelligent decisions.** We facilitate quicker, more proactive decision making by optimizing, managing and monitoring application workloads on Microsoft platforms and clouds; consolidating and integrating data; and facilitating powerful predictive analytics. We also offer artificial intelligence (AI)-based virtual agents that let workers access support for Microsoft-based solutions more easily and economically.
- **Modern platform for growth.** DXC’s IT modernization solutions provide a swift and sure path to unprecedented

business insights and the ability to capitalize on them. We use the flexibility and agility inherent in public, private and hybrid clouds to provide a platform for growth that empowers people and businesses to innovate and collaborate — anywhere, anytime. DXC Managed Services for Microsoft Azure unlock the flexibility and affordability of Azure and give you confidence, as you know that your applications are secure and managed 24x7. We help determine the best approach for each IT system, including identifying which applications are best retained on premises or in another cloud.

- **Secure business.** Security is a foundational element of every DXC and Microsoft solution. We minimize risk and exposure, augmenting Microsoft’s cloud-based solutions and user environments so they are protected, resilient, regulatory compliant and auditable. We work across the infrastructure, platform and application layers to help safeguard your corporate data, manage risk, promote business continuity and ensure compliance.

Joint offerings/solutions

DXC and Microsoft deliver enterprise-grade solutions and capabilities.

- **Digital workplace solutions.** DXC MyWorkStyle™ fosters collaboration, engagement, productivity and a consumer-like digital workplace experience with access to applications, data and information — anytime, anywhere and on any device. Our strong change management approach drives effective use of Microsoft Office 365 and Teams, Windows Virtual Desktop, Microsoft Managed Desktop and HoloLens.
- **Enterprise and cloud applications.** Our end-to-end, industry-specific solutions — purpose-built on Microsoft Dynamics 365 and Azure for maximum enterprise resource planning and customer relationship management functionality and innovation — afford powerful data insight, efficiencies and automation. Our solutions, strategic planning and implementation services accelerate cloud, on-premises and hybrid application deployment.
- **Cloud and platform services.** Our end-to-end services unlock the flexibility and affordability of Azure in the public cloud — or on-premises with Azure Stack — through application transformation, migration and 24x7 management and monitoring. Azure managed cloud services deliver SAP Analytics, Azure Kubernetes Service (AKS) and Azure Platform as a Service (PaaS) resource management based

on marketing-leading automation, simplified operational processes and enterprise-grade reliability.

- **Analytics.** DXC deploys offerings and capabilities on Microsoft Azure to ease data estate migration, modernize analytics programs and harness AI to transform data into actionable intelligence. We optimize data, workloads and analytics processes and deliver results that matter, so clients can focus on their customers and their business, and achieve better business outcomes. Our Analytics Modernization and Migration Factory applies a set of methods and accelerators for migration and transformation to Microsoft Azure, using products such as Synapse, IoT and Power Apps, including Power BI.
- **Application services.** DXC's application transformation factories leverage platform-native Azure services and proven DXC intellectual property to rapidly migrate and reinvigorate applications. We accelerate integration, mainframe modernization, cloud-native transformation and user interface/user experience (UI/UX), while optimizing, automating and rationalizing IT assets and services across the global enterprise. Coupled with the Analytics and Data Modernization and Migration Factory, we help you adopt Microsoft Azure faster, safely and at scale.
- **Software licensing and management solutions (SLMS).** The DXC SLMS strategic approach to software management and optimization

reduces costs and risks by enhancing visibility and control across the license estate and by improving software pricing, terms and compliance. SLMS, positioned as the Cloud Platform Services (CPS) back-office support for cloud vendors, centralizes processes and back-end tools. SLMS provides offering engagement/development; contract, vendor and vendor-incentive management; licensing specialist/customer solutioning; cloud business service desk; and delivery/account support.

Differentiation

DXC delivers highly differentiated solutions on the Microsoft platform — in a wide array of environments — that successfully address your complex enterprise needs. We couple our leading portfolio with deep industry expertise across healthcare, financial services, travel and transportation, retail and manufacturing to create solutions targeted at industry needs for maximum business impact. Our hosted and management services provide a complete solution while offering easy interoperability with Microsoft's best-in-class cloud services. Our customers can incorporate governance and financial management into our Microsoft Azure services to achieve the full benefits of an agile and optimized consumption model.
